Projects

PIGEONPOLL

<https://github.com/CS-262wingdings>

A phone party game where players learn about each other by asking questions, choosing who matches the question, and voting who was picked. Made with Android Native and Google Cloud Platform.

ASCENT INTO DARKNESS

<https://github.com/Agueliethun/villain-simulator-ui>

A personal passion project, this is an open world procedurally generated RPG, written in Java using libGDX. It explores the impact that every choice has in a dynamic and reactive world.
